

Go into 64 bits!

Upgrade your Microvision Instruments analysis system from 32 to 64 bits

Benefits

Time savings

Analysis become at least 2.5 times faster.

High Definition

Images are acquired and stored in full resolution:

75 x 50 mm sample ⇔ 1 HD image file

Security, Reliability and Continuity

Images are stored in full resolution. No data loss in case of future analysis or comparison.

Flexibility

No need for immediate sample analysis. Scanning/acquisition and analysis can be spaced – your operations schedule wins in flexibility.

Evolutivity

Benefit from next Microvision systems enhancements.
32 bits versions will be supported but will no more evolve.

Computer requirements

OS : Windows 7, Windows 8, 8.1 compliant

RAM : 8 GB to 16 GB

Processor : iCore 7 minimum

Peripherals and interfaces: USB3 slot and/or PCI express slot

Pricing

32 bits to 64 bits software upgrade at the price of a software update.

...and more

Ease of operation

Userfriendly turnkey systems, trade-oriented, simple and easy-to-learn

Data securization by access levels

« operator »,
« administrator »
and « supervisor ».
FDA compliance go with supervisor access level

Reproducible analysis

Full analysis saving/storage - images, reports and configuration parameters

Compatibility

Compliant with international industry standards, customizable reports, Excel data export
